

Ion

Hit the right nerve

Arcwave™ Ion is the world's first stroker to integrate Pleasure Air™ for the male body. The result is electrifying, body-shaking experience at the touch of a button. Ion will tease, suck and stimulate the Pacinian pleasure receptors to bring the orgasm to a whole new level.

Pleasure Air™

Experience a powerful new type of stimulation based entirely on pulsating airwaves. As the only product specifically designed to use airwaves to target the Pacinian pleasure receptors in the frenulum, Ion promises more intense orgasms. These receptors are highly sensitive and respond well to intense, direct stimulation, creating a new orgasm experience.

Smart Silence™

It's only on when you want it on. Stimulation starts and stops automatically as Ion senses skin contact with the Pleasure Air™ sensor. Never worry about any unwanted noise again, as Smart Silence will turn off your product as soon as there is no skin contact. Ion presents intuitive smart technology perfect for anyone.

CleanTech Silicone

Keeping your Ion clean is simple. Arcwave's cutting-edge CleanTech silicone is super smooth, hygienic and durable. Precision engineering gives this material a superior finish. CleanTech silicone is only available to the Arcwave range. What makes it special is its high density and composition means it is particularly safe from pathogens and germs. In addition, Arcwave's CleanTech silicone is hypoallergenic and resistant to UV-light which makes it more durable and hygienic than conventional materials like on the market.

Twist to Open

Cleaning and drying don't have to be a chore. Simply twist off the upper part, rinse with water and put Ion back on the discreet storage base to dry.

Storage base

Ion's innovative storage base doubles as a charging base. After use, simply return your Ion to the storage base and it will charge automatically.

DryTech Stick

Integrated into the storage base, the DryTech stick removes any water droplets, keeping the product in great condition. Users insert DryTech packs which contain silica granules into the DryTech stick. This helps speed up the drying process.

Features

- Pleasure Air™ (8 intensity settings)
- Smart Silence™
- Twist to Open mechanism for easy cleaning
- Standby mode
- 100% Waterproof IPX7
- CleanTech silicone (hypoallergenic and medical grade)
- LED charging indicators in storage base
- Storage base for charging and drying base
- Integrated DryTech stick with DryTech packs
- Quick start user guide in the box in English
- Comprehensive manual on the website in 15 languages
